Education

University of Illinois Champaign, IL
Bachelor of Science in Computer Science Expected May 2027
Relevant coursework: Computer Architecture, Data Structures & Algorithms, Database Systems, Game Development

Projects

Al-Baqaa – Muslim Obituaries Platform Champaign, IL
React 18, TypeScript, Vite, Tailwind CSS • vipersurf.github.io/MuslimObituaries 2026

- Built and deployed a community platform for Janazah announcements: listings with filters, a submission portal, calendar (.ics) export, a condolence Memory Wall, charity trackers, and a verified funeral-services directory with map links
- Designed a shared JSON data layer behind an OpenAPI 3.0 contract, with a zero-dependency Node.js reference API server implementing the same endpoints, so the static frontend can switch to a live backend unchanged
- Shipped 6-language internationalization (Arabic, Urdu, Bengali, Spanish, Hindi, English) with right-to-left layouts and three themes; automated deployment to GitHub Pages via GitHub Actions CI/CD

Campus Housing – UIUC Apartments Champaign, IL
Vue 3, TypeScript, Python • vipersurf.github.io/uiuc-apartments.com 2026

- Revived and extended an open-source apartment aggregator (forked from reteps/uiuc-apartments.com): map and list search over 170+ Champaign-Urbana listings with filters for beds, baths, rent per bed, and semester availability
- Built a Python ingestion pipeline (BeautifulSoup) that scrapes landlord listing portals and geocodes addresses via the OpenStreetMap API; a scheduled GitHub Actions workflow re-runs the scrape weekly, commits the refreshed data feed, and redeploys the site automatically
- Added an anonymous landlord-review system with subscores (maintenance, communication, fairness, move-out), a public scoreboard, and disclosed sponsored placement for landlord partners

Islamic Golden Age – Interactive Data Visualization Champaign, IL
D3.js, JavaScript • vipersurf.github.io/projects/dataviz.html 2025

- Built an interactive D3.js narrative visualization presenting historical data with scroll-driven storytelling and dynamic charts

Experience

Confidential Technology Company IL
Software Engineer Intern May 2023 – Aug 2023

- Designed and implemented a centralized framework for team ecosystem documentation using Markdown, HTML, and JavaScript, improving accessibility and organization; developed configurable widgets enabling dynamic content creation without predefined data sources

Rosecrance Behavioral Health Champaign, IL
Engagement Specialist May 2025 – Present

- Recorded 2,500+ service contacts with 1,750 unique clients over the past year across a three-county service area, coordinating care linkage between inpatient, outpatient, and community providers
- Designed and maintained a data tracking system logging crisis events, response types, and outcomes; provided technical support alongside engagement duties

Technical Skills

Languages: TypeScript, JavaScript, Python, C++, Java, SQL, HTML/CSS, Bash
Frameworks & Libraries: React, Vue 3, Node.js, Tailwind CSS, Leaflet, D3.js
Tools & Platforms: Git, GitHub, GitHub Actions (CI/CD), REST APIs, OpenAPI, Linux/UNIX shell, Agile/Scrum, SDLC, AI-assisted development tools
